

Pages 1-21,

Description: Fully Assembled furniture and play equipment

Material type: A. Material is general recycled plastics.

Warranty: No manufacturers warranty but we are confident that due to the nature of the material used to make these, that they will last decades.

This is the only part of our range made by adults with disabilities, they design and manufacture all of these products and as part of a social enterprise, not for profit scheme. This makes these the cheapest of any outdoor furniture made from these profiles in the UK. Same prices from us or direct.

They use profiles made from UK recycled waste but these profiles are made in France and then sold back to the UK company that makes the furniture.

All other profiles on the following sheets are totally 100% UK waste, 100% UK made, and where stated have a UK manufacturers warranty which we prefer for those reasons.

Pages 22-27

Description: Profiles to replicate lumber and timber profiles, widest range of profiles.

Material type: A. Material is general recycled plastics.

Warranty: No manufacturers warranty but we are confident that due to the nature of the material used to make these, that they will last decades.

Pages 28-30

Description: Profiles to replicate lumber and timber profiles, small range of profiles.

Material type: B. Eco-Wood is made from 100% styrene from UK retail waste collection.

Same products as seen in B & Q.

Warranty: 12 year manufacturers warranty.

We are confident that due to the nature of the materials used to make these, that they will last decades.

Pages 31-33

Description: Profiles to replicate lumber and timber profiles, small range of profiles.

Material type: C. Made from recycled hardwoods and polymers.

Warranty: Massive 25 year manufacturers warranty.

All products in the Assembled Furniture and play equipment can also be made from this material to give the 25 year warranty, prices available on application.

Page 33-40: Our own designs using 10, 12 and 25 year profiles of 100% UK origin, Rule Britannia! Additional services offered by SignLine, we are using our superior manufacturing skills to provide higher quality products.

Prices are based on smaller orders, furniture there may be discount for quantity but more so for profiles, the problem for profiles is delivery which is quite high, if you talk to us about your project we may be able to offer better prices, especially for larger projects. We can supply profiles for DIY or we can undertake the complete project for you. Anything that can be made from timber, can be made with these materials but without the maintenance and should last decades longer.
